| BOX III. OBSERVATIONS WHERE UMTY OF INVENTION IS LACKIN | NG | |
| This application contains the following inventions or groups of inventions which are | e not so linked as to form a single general inventive | |
| concept under PCT Rule 13.1. In order for all inventions to be examined, the appro | priate additional examination fees must be paid. | |
| Group 1, claims 1-4, drawn to a flow-through oxygenator. | | |
| Group I, Claims 1-4, Grawn to a now-through oxygenator. | | |
| Group π, claim 5, drawn to an oxygen supersaturated water product. | | |
| Group m claims 6-8, drawn to a method for using the apparatus. | | |
| Group in claims 6-8, drawn to a method for using the apparatus. | | |
| The inventions listed as Groups I-HT do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule | | |
| 13.2, they lack the same or corresponding special technical features for the following | g reasons: Claim 1 is obvious in view of Divisek et al. | |
| US 4,225,401 accordingly the special technical features linking to the groups above no single inventive concept exists. | does not provide a contribution over the prior art and | |
| no single inventive concept exists. | | |
